West Virginia Reportable Infectious Diseases Facilities and Providers (WV Code 16-3-1; 64CSR7)

In WV: 800.423.1271, ext 1 Answering service: 304.347.0843 Fax: 304.558.8736

Reporting of the following communicable diseases is required by lawas follows:

October 2019

Category I Report suspect or confirmed cases immediately to the Local Health Department	Category II Report within 24 hours to the Local Health Department	Category III Report within 72 hours to the Local Health Department	Category IV Report within 1 week to the Local Health Department	Category V Report within 1 week to the State Health Department
• Anthrax	Animal bites	Campylobacteriosis	 Acute flaccid myelitis (AFM) 	• AIDS
Bioterrorist event	Brucellosis	Cryptosporidiosis	 Anaplasmosis 	Chancroid
Botulism	Cholera	Cyclospora	Arboviral infection	Chlamydia
Foodborne outbreak	Dengue fever	Giardiasis	Babesiosis	Creutzfeldt-Jakob disease
Intentional exposure to an infectious	Diphtheria	• Listeriosis	 Chickenpox (numerical totals only) 	Gonococcal conjunctivitis of the newborn
agent or biological toxin	• Hemophilus influenzae, invasive disease ³	Salmonellosis (except Typhoid	• Ehrlichiosis	(within 24 hours)
Middle East respiratory syndrome	Hemolytic Uremic Syndrome, postdiarrheal	fever) ³	 Hantavirus pulmonary syndrome 	Gonococcal disease, drug resistant (within)
(MERS)	 Hepatitis A, acute⁴ 	• Shigellosis ³	 Influenza-related death in an individual less 	24 hours)
Novel influenza infection, animal or	 Hepatitis B, acute, chronic or perinatal⁴ 	Trichinosis	than 18 years of age	Gonococcal disease, all other
human	• Hepatitis D ⁴	• Vibriosis	Legionellosis	 Hepatitis C, acute⁴
Orthopox infection, including	Meningococcal disease, invasive		 Leptospirosis 	• HIV
smallpox and monkeypox	Mumps, acute infection		Lyme disease	Pelvic inflammatory disease
Outbreak or cluster of any illness or	Pertussis (whooping cough)		Malaria	Syphilis (late)
condition ¹	Poliomyelitis		 Psittacosis 	Syphilis, primary, secondary or early later
Plague	Q-fever (Coxiella burnetii)		 Respiratory syncytial virus (RSV) – related 	(less than 1 year duration) or congenital
Rubella	Rabies; human or animal		death in an individual < 5 years of age	(within 24 hours)
Rubella, congenital syndrome	• Shiga toxin-producing Escherichia coli (STEC) ⁵		Spotted fever rickettsiosis	
Rubeola (Measles)	• Staphylococcus aureus with		• Streptococcal disease, invasive Group B	
SARS coronavirus infection	glycopeptide- intermediate		Streptococcal toxic shock syndrome	
Smallpox	(GISA/VISA) or glycopeptide- resistant		• Streptococcus pneumoniae, invasive ³	
Tularemia	(GRSA/VRSA) susceptibilities ³		• Tetanus	
Viral hemorrhagic fevers ²	• Tuberculosis; all forms ³		Toxic Shock Syndrome	
Waterborne outbreak	Typhoid fever (Salmonella typhi)		Tuberculosis, latent infection	
	Yellow fever		,	
	Zika virus disease			
	Any other unusual condition or			
	emerging infectious disease			
¹ In any setting ² Including filoviruses such as Ebola and Marburg and arenaviruses such as Lassa fever		Including results of susceptibility testing	⁴ Including results of hepatitis A and B serologies, transaminase levels and bilirubin ⁵ Including but not limited to <i>E coli</i> O157:H7
